NOTIFICATION OF TRANSMITTAL OF
THE INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY

(PCT Rule 71.1)

Date of mailing
(day/month/year)

14.07.2005

Applicant's or agent's file reference
15450PCT00

IMPORTANT NOTIFICATION

International application No.
PCT/DK2004/000451

International filing date (day/month/year)
24.06.2004

Priority date (day/month/year)
25.06.2003

Applicant
PHARMEXA AS et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY****IAP9 Rec'd PCT/PTO 14 DEC 2005**International application No.
PCT/DK2004/000451**Box No. I Basis of the report**

1. With regard to the **language**, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ This report is based on translations from the original language into the following language , which is the language of a translation furnished for the purposes of:
- ☐ international search (under Rules 12.3 and 23.1(b))
 - ☐ publication of the international application (under Rule 12.4)
 - ☐ international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the **elements*** of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):*

Description, Pages

1-37 as originally filed

Sequence listings part of the description, Pages

1-10 as originally filed

Claims, Numbers

1-48 as originally filed

Drawings, Sheets

1/4-4/4 as originally filed

☒ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing

3. ☐ The amendments have resulted in the cancellation of:
- ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
- ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):

* If item 4 applies, some or all of these sheets may be marked "superseded."

**INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY**International application No.
PCT/DK2004/000451**Box No. II Priority**

1. ☐ This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:
☐ copy of the earlier application whose priority has been claimed (Rule 66.7(a)).
☐ translation of the earlier application whose priority has been claimed (Rule 66.7(b)).
2. ☐ This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.
3. Additional observations, if necessary:
see separate sheet

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:
☐ the entire international application,
☒ claims Nos. 47, 48 (with respect to industrial applicability)
because:
☒ the said international application, or the said claims Nos. 47, 48 (with respect to industrial applicability) relate to the following subject matter which does not require an international preliminary examination (specify):
see separate sheet
☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
☐ no international search report has been established for the said claims Nos.
☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
the written form ☐ has not been furnished
☐ does not comply with the standard
the computer readable form ☐ has not been furnished
☐ does not comply with the standard
☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.
☐ See separate sheet for further details

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	1-48
	No: Claims	-
Inventive step (IS)	Yes: Claims	-
	No: Claims	1-48
Industrial applicability (IA)	Yes: Claims	1-46
	No: Claims	-

2. Citations and explanations (Rule 70.7):**see separate sheet**

**INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY**International application No.
PCT/DK2004/000451

Supplemental Box relating to Sequence Listing

Continuation of Box I, item 2:

1. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this report has been established on the basis of:
 - a. type of material:
 - ☒ a sequence listing
 - ☐ table(s) related to the sequence listing
 - b. format of material:
 - ☒ in written format
 - ☒ in computer readable form
 - c. time of filing/furnishing:
 - ☒ contained in the international application as filed
 - ☒ filed together with the international application in computer readable form
 - ☐ furnished subsequently to this Authority for the purposes of search and/or examination
 - ☐ received by this Authority as an amendment on
2. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
3. Additional observations, if necessary:

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/DK2004/000451

Re Item II

Priority

The claimed priority date is valid.

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The subject matter of claims 47, 48 is directed to methods for treatment of the human or animal body by surgery or therapy and/or diagnostic methods practised on the human or animal body. For the assessment on the question as to whether this subject matter is industrially applicable, no unified criteria exist in the PCT Contracting States. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT, Rule 67.1(iv)).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The following documents are referred to in this communication:

- D1: LAROCHE-TRAINEAU J ET AL: "Three-step purification of bacterially expressed human single-chain Fv antibodies for clinical applications" JOURNAL OF CHROMATOGRAPHY. BIOMEDICAL APPLICATIONS, ELSEVIER, AMSTERDAM, NL, vol. 737, no. 1-2, January 2000 (2000-01), pages 107-117, XP004184259 ISSN: 0378-4347
- D2: WO 97/24438 A (LAUS REINER ; WU HONGYU (US); RUEGG CURTIS L (US); ACTIVATED CELL THER) 10 July 1997 (1997-07-10)

2. a) Document D1, which is considered to represent the most relevant state of the

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/DK2004/000451

art, discloses (abstract; sections 2.3.4-2.3.6; page 116, left column, lines 1-3) a method for the purification of a recombinant protein comprising dialysis, metal affinity chromatography, size exclusion chromatography, anion exchange chromatography. From this, the subject-matter of claim 1 differs in that a method for the purification of an other protein is claimed.

The problem to be solved by present claim 1 may therefore be regarded as the provision of a method for the purification of a protein.

The solution proposed, namely the provision of a method for the purification of an EGFR family derived protein (such as HER-2) cannot be considered as involving an inventive step for the following reasons:

In view of the disclosure in document D1, the skilled person would regard it as obvious to combine several purification methods, such as those disclosed in D1 for the purification of HER-2. The skilled person would proceed without the use of inventive skill, using common knowledge and routine only, with a reasonable expectation of success.

In conclusion, the subject-matter of claim 1 does not involve an inventive step. The subject matter of claims 2-33 does not seem to add subject matter that would render this part of the application inventive. Therefore, the subject matter of claims 1-33 does not satisfy the criterion set forth in Article 33(3) PCT.

- b) The identification of a suitable purification scheme is an elaborate process which requires a lot of experimentation before a useful set of steps are found for the particular protein and raw material in question. Finding an advantageous combination of methods amongst a large number of possibilities is certainly time consuming.

However, the method as claimed is a normal combination of standard techniques, that the person skilled in the art would consider. There does at present not appear to be a surprising effect linked to the specific combination. In conclusion, no inventive step can be acknowledged at present.

If surprising effects were linked to the method for the purification of a specific protein, as might be shown by comparative examples, the objection might be reconsidered.

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/DK2004/000451

3. a) Document D2, which is considered to represent the most relevant state of the art for this part of the application, discloses (abstract; SEQ ID NO:3, 4; Figure 8) a Her-2 fusion protein, having a immunostimulatory effect. From this, the subject-matter of claim 34 differs in that a different HER-2 variant is claimed. SEQ ID NO:4 has 94.8% identity in a 660 amino acid overlap (33-692:20-674) with present SEQ ID NO:2.

The problem to be solved by present claim 34 may therefore be regarded as the provision of a HER-2 variant.

The solution proposed, namely the provision of a further HER-2 variant as defined by SEQ ID NO:2 cannot be considered as involving an inventive step for the following reasons:

In view of the disclosure in document D2, the skilled person would regard it as obvious to provide further variants of said protein. The skilled person would proceed without the use of inventive skill, using common knowledge only, with a reasonable expectation of success.

In conclusion, **in the absence of a surprising effect**, the subject-matter of claim 34 does not involve an inventive step. The subject matter of claims 35-48 does not seem to add subject matter that would render this part of the invention inventive. Therefore, the subject matter of claims 33-48 does not satisfy the criterion set forth in Article 33(3) PCT.

- b) An inventive step for the claimed protein might be acknowledged if the protein imparted unexpected properties, such as the combination of superior stability, immunogenicity, 3D structure and induction of high quality antibody, when compared to other Her-2 fusions. However, no evidence for such unexpected properties was submitted.
